

Diaverum would like to welcome you to our Corporate Education Session at the EDTNA/ERCA Conference in Dublin

Competence in Practice: Experience of a multi-country dialysis education program

Main Hall 9.00 am Monday 20th September 2010

As a provider of dialysis care to more than 16,000 patients in 14 countries we believe that staff education is fundamental to providing quality patient care. Since 2004 we have adopted a multi-country approach to provide a standardized education program to our clinic staff. Currently more than 2,500 dialysis care givers have successfully completed this program. During this corporate education session we will discuss our experience of program development and implementation.
