| Date        | Positive - total number | Test done – total number | Number of hospitalization | Patients on respirator | Death – total number | People in self-isolation |
|-------------|-------------------------|--------------------------|---------------------------|------------------------|----------------------|--------------------------|
| 28.02.2021. | 243 064                 | 1 398 066                | 762                       | 67                     | 5 526                | 11 777                   |

**Table 2. Number of testiting and positive test results on 28.02.2021.**

**Table 3. Distribution by gender and age from start of pandemic until 28.02.2021.**

## Covid-19 data for vaccination

Vaccination started on 28.12.2020. We are using Pfizer, Moderna and Astra Zeneca vaccine.

Unfortunately because lack of vaccine on global level, vaccination is not going according to the plan.

**Table 1. Vaccination data**

| Date        | Number of administered dose | First dose completed | Population percentage | Second dose completed | Population percentage |
|-------------|-----------------------------|----------------------|-----------------------|-----------------------|-----------------------|
| 28.02.2021. | 242 000                     | 182 000              | 4.46 %                | 60 000                | 1.47 %                |
