There are no volcanoes in Poland, but earthquakes happen here. There are many mines here. Earthquakes every day. These are small shocks, but they do damage, they are dangerous to buildings and people. Bombing alarms, terrorist threats, fires and floods also happen in Poland, but there is no plan to evacuate. Patients do not know the self-disconnect procedure. The staff also does not know this procedure. She does not exist in Poland.

The conference lasted two days. There was a lot of discussion, exchange of experiences. Nurses were invited to the EDTNA/ERCA conference in Prague.
