SCIENTIFIC PROGRAMME

The structure of our Scientific Programme for the EDTNA/ERCA International Conference is changed. It was decided to reduce the number of Guest Speakers (GS) in order to give more time and space to our fellow colleagues who come to present.

**There are two different Parallel Oral Sessions:**
1. Sessions with GS’s will have the following structure: GS + two oral presentations + three short oral presentations.
2. Sessions without GS’s will have the following structure: four oral presentations + three short oral presentations.

The aim is to invite and involve leading renal nursing staff as GS’s.

The title “Poster presentation on stage” was changed back to “Short Orals” as suggested by a number of delegates during the Conference in Krakow. Short Orals are without poster presentation this year.

**Session timings:**
- GS = 30 min including questions
- Oral Session = 15 min including questions
- Short Oral Session = 10 min including questions

**Scientific presentations on the website**
As usual, the scientific oral and poster presentations will be available for EDTNA/ERCA members after the Conference on the EDTNA/ERCA website www.edtna-erca.com/membership. The Guest speakers, main authors or presenters will be asked to give consent to the Conference Department in writing or by email by latest September 21.

**Abstract Book**
The Abstract Book is available for download on the EDTNA/ERCA Conference website [www.edtna-erca.com/conferences/scientific-programme](http://www.edtna-erca.com/conferences/scientific-programme)
