

Activities and Achievements as EDTNA/ERCA Brand Ambassador for Greece

During the previous year as EDTNA/ERCA Brand Ambassador for Greece, I actively promoted the mission, strategic objectives, and scientific initiatives of the Association within the Greek nephrology nursing community. A central aspect of my role was the dissemination of EDTNA/ERCA activities through national scientific and educational events.

In 2025, I contributed to the 35th Annual Scientific Meeting of the Hellenic Nephrology Nursing Association (HENNA), entitled “Nephrology Nursing in the Digital Era: Challenges and Prospects.” Through my presentation, I provided official updates on EDTNA/ERCA actions, strategic priorities, and educational projects, and invited participants to the forthcoming EDTNA/ERCA International Conference, highlighting the importance of digital competencies, evidence-based practice, and alignment with European standards of renal nursing care.

Furthermore, I participated in the HENNA webinar organized in the context of World Kidney Day on the safe use of nuclear medicine in dialysis patients, supporting the dissemination of best clinical practices and emphasizing the value of international cooperation.

My activities also included participation in the 23rd Interregional Scientific Meeting of HENNA in Katerini, focused on patient-centered nephrology nursing care. During this meeting, I presented the mission, ongoing initiatives, and educational opportunities of EDTNA/ERCA, encouraging Greek nephrology nurses to engage in European committees, working groups, and training programs.

Through these actions, I strengthened the visibility of EDTNA/ERCA in Greece and promoted professional excellence, continuous education, and high-quality patient care.
